Logline

Framed for a global catastrophe by her closest confidant, a brilliant arms dealer must dismantle the empire she unknowingly built on lies and a devastating bioweapon to clear her name and confront the monstrous truth of her past.

The Story

Anya “Thorn” Petrova is feared, untouchable, and emotionally unshakeable—until a calculated betrayal by her lover and business partner, Julian Vance, makes her the world’s most wanted terrorist. He’s unleashed “Project Chimera,” a bio-weapon born from her stolen research, and used her global arms network to orchestrate genocide.

As her empire burns, Anya goes on the offensive, racing through scorched safehouses, black-market auctions, and global intelligence traps to stop Chimera’s sale at an underground event known only as The Ragnarok Gala. Alongside a rogue hacker and a disillusioned CIA agent, she must choose between revenge and redemption in a brutal reckoning with her legacy.
