Logline

Love becomes evidence in a war over reality

After a brilliant security architect survives a staged ambush that kills the man she loves, her trusted mentor uses trauma, medicine, and institutional power to rewrite her memory and turn her into the public face of his covert empire.

Six months later, one unexplained page and a rhythm her hands refuse to forget tell her the official story is a lie.

Kat Sullivan

Late 30s to early 40s | Security architect | Series lead

“I built the brakes before I built the engine.”

MIND

Reads systems faster than people can weaponize them.

CONFLICT

Every clue may be real, planted, or left by an earlier version of herself.

GOAL

Prove Markus lived, reclaim her own history, and stop Article 7 from becoming Carl’s private intelligence network.

ARC

From controlled witness to architect of her own counter-operation.

Her deepest fear is not forgetting Markus. It is discovering that she chose to.

06

Markus Voss & Carl Reeves

Love and control pull Kat toward opposite versions of herself

MARKUS VOSS

Field operative. Lover. Ghost.

Markus carries guilt from an extraction he failed years earlier. He recognizes Carl's trap before Kat does, sacrifices himself at the Danube, and returns six months later under conditions that prevent him from reaching her openly.

CARL REEVES

Mentor. Sponsor. Author of the lie.

Carl raised Kat inside the institution and knows exactly which bonds she will trust. He turns grief into dependency, promotes the woman he has reconstructed, and uses her brilliance to legitimize power that no government can fully see.

Markus remembers who Kat was. Carl decides who Kat becomes.

07

Supporting Characters

Every ally carries a different version of Kat’s past

DESSA

DUVAL

Political operator who suspects the treaty serves an intelligence agenda.

NIGHTINGALE

The alleged mole whose identity leads Kat and Markus into the Giurgiu trap.

08

Why It Works for Premium Television

A contained pilot opens into an international conspiracy

A clear repeatable engine

Kat recovers fragments, tests reality, and builds a covert resistance while Carl monitors every move.

A lead built for awards-level performance

Kat must play competence, grief, doubt, and awakening inside the same scene.

Global scope with disciplined production

Diplomatic interiors and a few signature international sequences create scale without constant spectacle.

A commercial conspiracy

Article 7 turns policy into danger: cross-border covert authority with limited oversight.

Emotional stakes beneath the tradecraft

The love story gives every clue a personal cost.

A visual brand audiences can remember

Page 41, the edelweiss pin, and the three-two rhythm become franchise symbols.
