

Genre: Investigative True Crime / Digital Culture

Logline: *A chilling dive into the dark side of online fame and digital footprints—where what begins as viral glory can end in tragedy.*

SEASON ARC: From Viral to Fatal – 10 Episodes

EPISODE 1: “The Hashtag That Killed”

A teen dies attempting a viral TikTok challenge as his audience watches in real time.

Themes: Crowd psychology, online dares, responsibility of platforms

Based on: Arriani Arroyo + TikTok blackout challenge

EPISODE 2: “The Troll Who Came to Dinner”

A female streamer is doxxed and stalked by an obsessive fan.

Themes: Swatting, parasocial relationships, platform accountability

Based on: Pokimane, Amouranth, Andrew Finch case

EPISODE 3: “The Influencer Vanishes”

A beauty YouTuber posts a cryptic final video before disappearing.

Themes: Internet sleuths, mental health, surveillance culture

Based on: Mikki Marie, Elisa Lam parallels

EPISODE 4: “Catfished into Crime”

A lonely man is lured into laundering money for a fake girlfriend.

Themes: Romance scams, manipulation, digital financial crimes

Based on: Nigeria-based scams + Sweetie sting case

EPISODE 5: “The Dark Side of ASMR”

A top ASMR artist is stalked by a fan convinced she’s in love with him.

Themes: Obsession, projection, unintended intimacy

Based on: Gentle Whispering, real stalker cases

EPISODE 6: “Livestreamed Lies”

A wellness influencer fakes a cancer diagnosis to solicit donations.

Themes: Digital fraud, monetized sympathy, influencer ethics

Based on: Belle Gibson + TikTok “cancer girl” scandals

EPISODE 7: “Deepfaked to Death”

A revenge-seeking ex uses deepfake porn to ruin his former partner’s life.

Themes: AI abuse, revenge porn, digital blackmail

Based on: Deepfake incidents + Noelle Martin's advocacy

EPISODE 8: “When Stan Culture Turns Deadly”

Online fandoms turn toxic, targeting a perceived enemy until tragedy strikes.

Themes: Cancel culture, mob mentality, cyberbullying

Based on: Sulli (K-pop), Megan Thee Stallion online attacks

EPISODE 9: “The Hacker in the Group Chat”

A school’s secret group chat leaks—destroying reputations and exposing crimes.

Themes: Teenage digital ethics, cancel culture, privacy

Based on: Suburban high school leaks, Snapchat blackmail rings

EPISODE 10: “The Digital Autopsy”

Finale interweaving threads from all cases: How the internet magnifies danger.

Themes: Societal impact, accountability, solutions

Format: Mashup montage, expert conclusions, viewer call-to-action

Digital Culture Expert	Dr. Sarah T. Roberts (UCLA), Taylor Lorenz (journalist), Dr. Emily D. Baker (legal commentator)	Academic or journalistic authority on internet culture, credible and well-spoken
Psychologist / Body Language Analyst	Dr. John Duffy, Dr. Ramani Durvasula, Dr. Wendy Walsh	Can speak to emotional manipulation, behavior on-camera, obsessive behavior
Cybersecurity / Forensics	Rachel Tobac, Chris Hadnagy, Hany Farid (deepfake detection)	Experts in hacks, identity theft, doxxing, and forensic tracking

Survivors / Subjects	Real TikTok creators, streamers, influencers impacted by online trauma	Raw emotional POVs, humanizing the digital experience
Law Enforcement / FBI	Retired agents like James R. Fitzgerald or active cybercrime agents (via mask/voice distort)	Offer gravity and real investigative insight
Whistleblowers / Moderators	Former Facebook/TikTok content moderators (anonymous or anonymized)	Brings insider tension and exposes tech platform flaws
Marquee Voices for Narration or Commentary	Jameela Jamil, Gabrielle Union, Hasan Minhaj, Ayo Edebiri, Logan Browning	Known advocates for mental health, digital responsibility, or young audiences — great for promo buzz

DIGITAL SHADOWS

SERIES BIBLE

Genre: Investigative True Crime / Digital Culture

Format: 10-Episode Limited Series

Runtime: 60 minutes per episode

Target Audience: Adults 18-54, digitally native viewers concerned about online safety

SERIES OVERVIEW

Logline

A chilling dive into the dark side of online fame and digital footprints—where what begins as viral glory can end in tragedy.

Series Arc: From Viral to Fatal

Each episode examines how digital culture amplifies human behavior to dangerous extremes. The series builds from individual cases of online harm (Episodes 1-3) to systemic exploitation (Episodes 4-6) to weaponized technology (Episodes 7-9), culminating in a comprehensive examination of solutions and accountability (Episode 10).

Tone & Style

- **Visual Language:** Dark, sleek aesthetic mixing forensic-style documentation with social media imagery
 - **Narrative Voice:** Investigative journalism meets psychological thriller
 - **Ethical Framework:** Survivor-centered, solution-oriented, platform-accountability focused
 - **Production Approach:** Real footage, expert interviews, tasteful recreations, data visualizations
-

EPISODE BREAKDOWN

EPISODE 1: "The Hashtag That Killed"

A teen dies attempting a viral TikTok challenge as his audience watches in real time.

Runtime: 60 minutes

Based On: Arriani Arroyo case + TikTok blackout challenge incidents

Story Structure:

- **Cold Open (0-5 min):** Live stream footage of the incident, ending just before tragedy
- **Act I (5-20 min):** Who was the victim? Understanding viral challenge culture
- **Act II (20-45 min):** The night it happened - recreation and investigation
- **Act III (45-55 min):** Aftermath, platform response, family impact
- **Coda (55-60 min):** Expert analysis and prevention strategies

Key Interviews:

- **Victim's Family:** Parents, siblings (if consenting)
- **Digital Culture Expert:** Dr. Sarah T. Roberts on viral mechanics
- **Psychologist:** Dr. Ramani Durvasula on crowd psychology and peer pressure
- **Former TikTok Moderator:** Anonymous, on challenge detection failures
- **Peers/Classmates:** Friends who witnessed the livestream
- **Legal Expert:** Platform liability and duty of care

Central Themes:

- How algorithms amplify dangerous content for engagement
- Teenage brain development vs. social media design
- The psychology of performing for an invisible audience
- Platform responsibility vs. parental responsibility

Visual Elements:

- Screen recordings of the challenge trending
- Data visualization of challenge spread patterns
- Hospital/emergency response footage (if available)
- Social media memorial posts and reactions

Key Questions Explored:

- Could this have been prevented by better content moderation?
 - How do viral challenges spread so quickly among teens?
 - What legal recourse do families have against platforms?
 - How do we balance free expression with harm prevention?
-

EPISODE 2: "The Troll Who Came to Dinner"

A female streamer is doxxed and stalked by an obsessive fan.

Runtime: 60 minutes

Based On: Pokimane, Amouranth incidents + Andrew Finch swatting case

Story Structure:

- **Cold Open (0-5 min):** Police bodycam footage of swatting incident
- **Act I (5-20 min):** The streamer's rise to fame and early fan interactions
- **Act II (20-45 min):** Escalation pattern - gifts, messages, threats, doxxing
- **Act III (45-55 min):** The swatting incident and its aftermath
- **Coda (55-60 min):** Legal consequences and ongoing security measures

Key Interviews:

- **The Streamer:** Primary subject (face obscured/voice altered if requested)
- **Cybersecurity Expert:** Rachel Tobac on doxxing techniques and prevention
- **FBI Cybercrime Unit:** Agent specializing in online stalking (masked interview)
- **Parasocial Relationship Expert:** Dr. Wendy Walsh on fan obsession
- **Fellow Streamers:** Others who've experienced similar harassment
- **The Stalker's Former Friend/Family:** Insight into escalation (anonymous)

Central Themes:

- Parasocial relationships and perceived intimacy
- The weaponization of emergency services
- How streaming platforms monetize vulnerability
- The gendered nature of online harassment

Visual Elements:

- Chat logs and escalating messages (anonymized)
- Surveillance footage from victim's home
- Map showing doxxing information spread
- Platform response timelines and policies

Key Questions Explored:

- How do normal fans become dangerous stalkers?
 - What early warning signs do platforms ignore?
 - Why is law enforcement often unprepared for digital stalking?
 - How can streamers protect themselves without losing authenticity?
-

EPISODE 3: "The Influencer Vanishes"

A beauty YouTuber posts a cryptic final video before disappearing.

Runtime: 60 minutes

Based On: Mikki Marie case with Elisa Lam parallels

Story Structure:

- **Cold Open (0-5 min):** The final video - disturbing and cryptic
- **Act I (5-20 min):** The influencer's life, success, and hidden struggles
- **Act II (20-45 min):** Internet sleuths mobilize, clues emerge
- **Act III (45-55 min):** The search, discovery, and tragic conclusion
- **Coda (55-60 min):** The ethics of crowdsourced investigation

Key Interviews:

- **Family Members:** Parents, siblings on her mental health struggles
- **Internet Sleuths:** Reddit/TikTok users who investigated (anonymous)
- **Mental Health Expert:** Dr. John Duffy on influencer pressure and depression
- **Former Manager/Agency:** Business pressures in creator economy
- **Digital Forensics Expert:** Hany Farid on analyzing the final video
- **Law Enforcement:** Detective who worked the case

Central Themes:

- The mental health cost of constant content creation
- How online investigation can help and harm
- The surveillance culture of social media
- The pressure to perform happiness for profit

Visual Elements:

- Progression of the influencer's content over time
- Map of crowdsourced search efforts
- Analysis of the cryptic final video
- Behind-the-scenes glimpse of creator lifestyle

Key Questions Explored:

- When does amateur internet sleuthing cross ethical lines?
 - How do we balance content creator welfare with audience demands?
 - What signs of mental health crisis do algorithms miss or ignore?
 - Should platforms have duty of care for creators' wellbeing?
-

EPISODE 4: "Catfished into Crime"

A lonely man is lured into laundering money for a fake girlfriend.

Runtime: 60 minutes

Based On: Nigeria-based romance scams + Sweetie Project insights

Story Structure:

- **Cold Open (0-5 min):** Bank surveillance footage of victim making transfers
- **Act I (5-20 min):** The victim's loneliness and initial "meeting" online
- **Act II (20-45 min):** The relationship deepens, requests begin
- **Act III (45-55 min):** The scheme unravels, legal consequences
- **Coda (55-60 min):** The global scale of romance fraud

Key Interviews:

- **The Victim:** Primary subject (face obscured if requested)
- **Former Romance Scammer:** Anonymous interview from Nigeria
- **FBI Financial Crimes Division:** Agent specializing in romance fraud

- **Cybersecurity Expert:** Chris Hadnagy on social engineering tactics
- **Victim's Family/Friends:** Missed warning signs and aftermath
- **Banking Security Expert:** How financial institutions detect and prevent fraud

Central Themes:

- Loneliness as vulnerability in digital age
- Economic desperation driving cybercrime globally
- The sophistication of modern romance scams
- How technology enables both connection and exploitation

Visual Elements:

- Screenshots of dating profiles and conversations
- Money transfer records and financial flows
- Map showing global romance scam operations
- Expert breakdown of manipulation techniques

Key Questions Explored:

- How do scammers identify and target vulnerable victims?
- What role do dating apps play in enabling fraud?
- Why are romance scam victims often blamed and shamed?
- How can financial institutions better protect customers?

EPISODE 5: "The Dark Side of ASMR"

A top ASMR artist is stalked by a fan convinced she's in love with him.

Runtime: 60 minutes

Based On: Gentle Whispering incidents and real ASMR creator stalking cases

Story Structure:

- **Cold Open (0-5 min):** 911 call from ASMR creator reporting break-in
- **Act I (5-20 min):** The world of ASMR and its unintended intimacy
- **Act II (20-45 min):** Fan escalation from comments to real-world stalking
- **Act III (45-55 min):** Confrontation and legal resolution
- **Coda (55-60 min):** The broader issue of weaponized intimacy online

Key Interviews:

- **The ASMR Creator:** Primary subject discussing the experience
- **Other ASMR Artists:** Shared experiences of inappropriate fan behavior
- **Psychologist:** Dr. Ramani Durvasula on projection and obsessive behavior
- **The Stalker's Therapist:** Anonymous interview about treatment (if possible)
- **YouTube Safety Team:** Platform response to creator harassment
- **Legal Expert:** Restraining orders and digital boundaries

Central Themes:

- Unintended intimacy in digital performance
- How ASMR's therapeutic nature creates vulnerable connections
- The monetization of comfort and the ethics involved
- Male entitlement and the objectification of female creators

Visual Elements:

- ASMR video compilation showing intimate nature of content
- Escalating fan messages and gifts
- Security camera footage from creator's home
- Data on harassment patterns in intimate content categories

Key Questions Explored:

- Is there something inherently problematic about monetizing intimacy?
- How can creators maintain boundaries while meeting audience needs?
- What responsibility do platforms have for protecting intimate content creators?
- How do we distinguish healthy parasocial relationships from dangerous ones?

EPISODE 6: "Livestreamed Lies"

A wellness influencer fakes a cancer diagnosis to solicit donations.

Runtime: 60 minutes

Based On: Belle Gibson scandal + TikTok "cancer girl" cases

Story Structure:

- **Cold Open (0-5 min):** Compilation of fake cancer posts and donation pleas
- **Act I (5-20 min):** The influencer's rise through wellness content

- **Act II (20-45 min):** The fake diagnosis, growing following, and donations
- **Act III (45-55 min):** Investigative unraveling and community backlash
- **Coda (55-60 min):** The psychology of digital fraud and victim impact

Key Interviews:

- **Defrauded Donors:** People who gave money believing the story
- **Medical Professional:** Oncologist on spotting fake cancer claims
- **Former Friend/Insider:** Someone who knew about the deception
- **Legal Expert:** Emily D. Baker on fraud prosecution challenges
- **Platform Investigation Team:** How social media companies detect fraud
- **Psychologist:** Dr. John Duffy on pathological lying and attention-seeking

Central Themes:

- The monetization of sympathy and vulnerability
- How wellness culture enables harmful misinformation
- The challenge of prosecuting digital fraud
- Community responsibility in vetting donation requests

Visual Elements:

- Timeline of inconsistent medical claims
- Financial records showing donation flows
- Medical documentation (or lack thereof)
- Community investigation efforts and evidence gathering

Key Questions Explored:

- What makes people vulnerable to charity fraud?
- How do platforms balance supporting legitimate medical fundraising with preventing fraud?
- Should influencers face different standards of accountability?
- What legal remedies exist for donation fraud victims?

EPISODE 7: "Deepfaked to Death"

A revenge-seeking ex uses deepfake porn to ruin his former partner's life.

Runtime: 60 minutes

Based On: Real deepfake incidents + Noelle Martin's advocacy work

Story Structure:

- **Cold Open (0-5 min):** Victim discovering deepfake videos of herself online
- **Act I (5-20 min):** The relationship, breakup, and initial revenge attempts
- **Act II (20-45 min):** Deepfake creation and distribution, life destruction
- **Act III (45-55 min):** Legal battle and attempts at content removal
- **Coda (55-60 min):** The future threat of AI-generated abuse content

Key Interviews:

- **The Victim:** Primary subject (face obscured, voice altered if requested)
- **Deepfake Detection Expert:** Hany Farid on technology and detection methods
- **Noelle Martin:** Advocate and deepfake victim sharing similar experience
- **Tech Ethicist:** On AI development responsibility
- **Prosecutor:** Challenges in prosecuting deepfake crimes
- **Platform Safety Expert:** Content removal policies and effectiveness

Central Themes:

- AI technology as a weapon of gender-based violence
- The impossibility of putting digital content "back in the box"
- Legal system inadequacy for emerging tech crimes
- The democratization of sophisticated abuse tools

Visual Elements:

- Technical breakdown of deepfake creation process (educational)
- Before/after comparison showing detection methods
- Legal document timeline and court proceedings
- Expert analysis of policy responses globally

Key Questions Explored:

- How can we prevent AI tools from being weaponized for abuse?
 - What legal protections exist for deepfake victims?
 - Should tech companies be liable for how their tools are misused?
 - How do we balance innovation with preventing harm?
-

EPISODE 8: "When Stan Culture Turns Deadly"

Online fandoms turn toxic, targeting a perceived enemy until tragedy strikes.

Runtime: 60 minutes

Based On: Sulli (K-pop) case + Megan Thee Stallion online attacks

Story Structure:

- **Cold Open (0-5 min):** Social media montage showing escalating attacks
- **Act I (5-20 min):** The power and positive aspects of fandom culture
- **Act II (20-45 min):** How stan culture turns toxic, mob formation
- **Act III (45-55 min):** The tragic outcome and fandom reckoning
- **Coda (55-60 min):** Preventing toxic fandom before it turns deadly

Key Interviews:

- **Victim's Friends/Family:** Impact of online harassment on mental health
- **Former Toxic Fans:** Anonymous interviews about mob mentality participation
- **Fandom Studies Expert:** Dr. Sarah T. Roberts on community dynamics
- **K-pop Industry Insider:** Pressures and mental health in idol culture
- **Social Media Psychologist:** Dr. Wendy Walsh on group dynamics online
- **Platform Moderator:** Challenges in managing fandom harassment

Central Themes:

- How passionate support becomes weaponized harassment
- The psychology of mob mentality in digital spaces
- Cultural pressures in entertainment industries globally
- The responsibility of fandom leaders and platforms

Visual Elements:

- Social media attack patterns and coordination
- Mental health impact documentation
- Industry pressure and public scrutiny compilation
- Expert analysis of group psychology online

Key Questions Explored:

- At what point does passionate fandom become dangerous?
- How can fan communities self-police toxic behavior?
- What role do platforms play in enabling coordinated harassment?

- How do cultural differences affect online mob dynamics?
-

EPISODE 9: "The Hacker in the Group Chat"

A school's secret group chat leaks—destroying reputations and exposing crimes.

Runtime: 60 minutes

Based On: Suburban high school leaks + Snapchat blackmail rings

Story Structure:

- **Cold Open (0-5 min):** Parents discovering their teens' participation in leaked chat
- **Act I (5-20 min):** Teenage digital life and the culture of secret sharing
- **Act II (20-45 min):** The leak, community explosion, and revealed crimes
- **Act III (45-55 min):** Legal consequences, family devastation, school response
- **Coda (55-60 min):** Teenage digital ethics and prevention education

Key Interviews:

- **Affected Students:** Anonymous interviews about participation and consequences
- **Parents:** Discovering their children's digital behavior
- **School Administration:** Response to digital crisis management
- **Digital Privacy Expert:** On teenage privacy vs. safety
- **Youth Psychologist:** Dr. John Duffy on adolescent brain development and technology
- **Law Enforcement:** Prosecuting crimes discovered through leaks

Central Themes:

- The permanence of digital communication vs. teenage impulsivity
- Privacy expectations in digital age relationships
- How schools and families address digital behavior
- The ethics of exposing private conversations

Visual Elements:

- Chat interface recreations (anonymized)
- Timeline of leak spread through community
- Legal proceeding documentation
- Expert analysis of teenage digital behavior patterns

Key Questions Explored:

- How do we teach teenagers about digital consequences?
 - When is exposing private digital behavior justified?
 - What legal protections exist for teenage digital privacy?
 - How can schools better address digital citizenship?
-

EPISODE 10: "The Digital Autopsy"

Finale interweaving threads from all cases: How the internet magnifies danger.

Runtime: 60 minutes

Format: Mashup montage, expert conclusions, viewer call-to-action

Story Structure:

- **Cold Open (0-5 min):** Rapid-fire montage of all nine previous cases
- **Act I (5-20 min):** Common patterns across all cases - what connects them?
- **Act II (20-40 min):** Expert roundtable on systemic solutions
- **Act III (40-55 min):** Success stories - prevention and intervention that worked
- **Coda (55-60 min):** Call to action for viewers - what can individuals do?

Key Interviews:

- **All Previous Episode Experts:** Roundtable format discussing solutions
- **Tech Industry Whistleblower:** Anonymous insider on platform reform needs
- **Policy Expert:** Proposed legislation and regulatory approaches
- **Survivor Advocate:** Someone who's turned their digital trauma into activism
- **Educator:** Digital literacy curriculum and youth protection
- **International Expert:** How other countries handle digital safety

Central Themes:

- Technology amplifies both human connection and human harm
- Individual responsibility vs. systemic change
- The urgent need for digital literacy education
- Hope and actionable solutions for safer online spaces

Visual Elements:

- Data visualizations showing scale of digital harm

- Split screens comparing international policy approaches
- Success story documentation and positive outcomes
- Resource lists and action items for viewers

Key Questions Explored:

- What systematic changes could prevent these tragedies?
 - How do we balance innovation with safety?
 - What role should government play in regulating digital spaces?
 - How can individuals protect themselves and others online?
-

RECURRING ELEMENTS

Visual Style Guide

- **Color Palette:** Deep blues, clinical whites, warning reds
- **Typography:** Clean, modern sans-serif with digital glitch effects for emphasis
- **Graphics Package:** Social media interface recreations, data visualizations, forensic-style evidence presentation
- **Music/Sound:** Electronic undertones, social media notification sounds as motifs

Expert Interview Format

- **Consistent Setup:** Neutral background, professional lighting
- **Anonymous Interviews:** Silhouettes, voice alteration, secure locations
- **B-Roll Integration:** Expert comments over relevant footage and graphics
- **Fact-Check Displays:** On-screen verification of expert credentials and claims

Ethical Guidelines

- **Victim Consent:** All subjects provide informed consent, with ongoing right to withdraw
 - **Mental Health Support:** Trauma counselors available for all participants
 - **Legal Review:** All content reviewed by legal team specializing in digital privacy
 - **Platform Accountability:** Direct requests for comment from all mentioned platforms
-

SERIES THEMES

Primary Message

Digital technology amplifies human nature - both our capacity for connection and our capacity for harm. Understanding these amplification effects is crucial for creating safer online spaces.

Secondary Themes

- **Individual Agency vs. Systemic Change:** What can people do vs. what institutions must do
 - **Privacy vs. Safety:** Balancing personal privacy with collective security
 - **Innovation vs. Regulation:** How to encourage technological progress while preventing harm
 - **Education vs. Enforcement:** Prevention through digital literacy vs. punishment after harm
-

TARGET AUDIENCE ANALYSIS

Primary Demographic (60% of audience)

- **Age:** 25-45
- **Digital Behavior:** Heavy social media users, concerned about online safety
- **Values:** Social justice, corporate accountability, technological literacy
- **Viewing Habits:** Streaming platforms, true crime content, documentary series

Secondary Demographic (25% of audience)

- **Age:** 18-34
- **Digital Behavior:** Digital natives, content creators, influencer economy participants
- **Values:** Authenticity, mental health awareness, platform reform
- **Viewing Habits:** YouTube, TikTok, streaming documentaries

Tertiary Demographic (15% of audience)

- **Age:** 45-65
- **Digital Behavior:** Moderate social media use, parents of digital natives
- **Values:** Family safety, youth protection, regulatory oversight
- **Viewing Habits:** Traditional TV, streaming platforms, news documentaries

PRODUCTION NOTES

Legal Considerations

- **Defamation Protection:** All platform and individual claims verified through multiple sources
- **Privacy Laws:** Compliance with GDPR, CCPA, and international privacy regulations
- **Copyright Issues:** Fair use analysis for all social media content and platform footage
- **Criminal Cases:** Coordination with law enforcement on ongoing investigations

Technical Requirements

- **Digital Forensics:** Specialized equipment for analyzing digital evidence
- **Security Protocols:** Encrypted communication for all sensitive interviews
- **Animation/Graphics:** 3D modeling capabilities for technical explanations
- **Archive Licensing:** Rights clearance for social media content and news footage

Distribution Strategy

- **Primary Platform:** Major streaming service with global reach
- **Educational Outreach:** Partnerships with digital literacy organizations
- **Policy Impact:** Briefings for legislators and platform policy teams
- **International Versions:** Subtitling and cultural adaptation for global markets
